**2. Citations and explanations :**

D1 = KR 2001-672 A

D2 = KR 2001-92538 A

D1 relates to a system and method for changing integrated interface according to a user request. The technical features of D1 comprise reorganizing integrated interface according to a user request and modifying & transforming the type or function of a communicator into a more convenient type. And D2 relates to a system and method for providing an information service on the communication network. Various services provided by D2 include information on the location of the partner registered as a local chatting or couple using a couple communication terminal and transmitting character message information.

On the other hand, the present invention describes how to provide a target menu page to enhance access to menu frequently used in the corresponding time and location after catching the time and location of a wireless internet user.

When comparing the present invention with D1 and D2, none of D1 & D2 teaches nor fairly suggests the target menu page. Therefore, the present invention is considered to be novel and industrially applicable.
